

1. i am writing to you today about LPFM stations takeing over current FM translator services such as our local FM translators like Airl, which would aversivly be affected wiht LPFM taking priority over them causing those in my community to loose airl.

2. Airl a christian music station, is the only contemporary station we can get in the central coast where i live, we the youth need this music, its gets us through the day and provides an alternative to the rampant secular music and spanish radio.

3. Airl is of public interest because christian music is the fastest growing genre of music,if our community is to be based on christian ideals we need to have christian music.

Thankyou for your time,

In Christ,

Emerald
